

BioBus Site Map

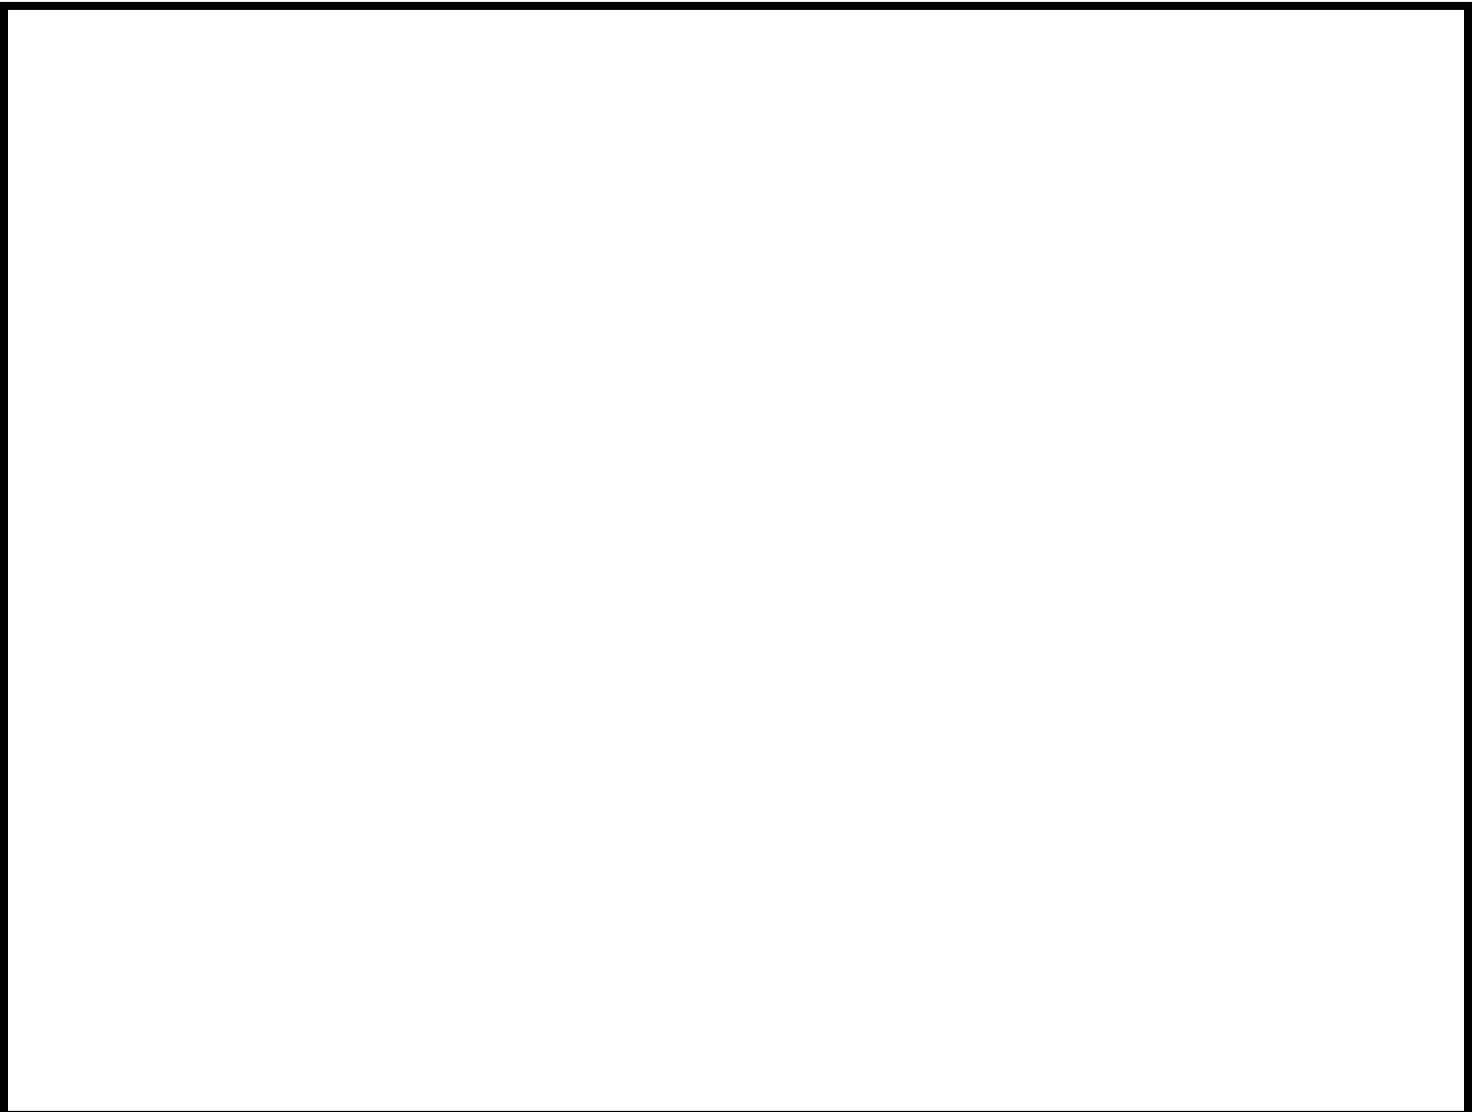

Directions: Please draw a site map pointing to the BioBus location on your campus, showing any major roads and landmarks that will help the driver deliver the BioBus to its correct location. **The BioBus needs a LEVEL, paved space at least 50' x 17 with a height clearance of 13'.** Before delivery of the bus, the site should be **clearly marked** (e.g. traffic cones, signs, caution tape, chalk). If the BioBus is going to be parked behind locked gates, please make arrangements to have the gate unlocked. The BioBus is usually delivered the day before the visit, although early morning deliveries on the first visit day are possible. We ask that the location not disrupt the flow of traffic. **Once parked the BioBus *cannot* be moved by the staff.** Thank you.
